

Including Every Deaf Person Through Intersectionality

Petra M. Horn-Marsh, Ph.D. & Iris Wigley

December 5, 2020 at 10AM-10PM CST via ZOOM

\$20 / registration at KAI-RID.org

The workshop brings interpreter participants, both Deaf and Hearing, to the next level of understanding of the impact and role of various identities within the Deaf communities on the national and local levels, following the framework of intersectionality. Intersectionality conceptualizes the various identities, ethnicities, linguistic uses and experiences of persons, groups of people, or social problems in the Deaf communities. Intersectionality looks at deaf people's overlapping identities and experiences in order to understand the complexity of prejudices they face due to their deaf, race, class, gender, sexual orientation, religion, and/or other identity markers.

There will be two breakout sessions for participant reflection and discussion. The breakout sessions focus on privilege and intersectionality within a movement, and solidarity and becoming intersectional ally of the Deaf communities.

The target audience is interpreters and Deaf participants learning and working together in a safe space to better understand intersectionality. KAI-RID worked in partnership with RID, Nexus Interpreting, and Interprettek.

*Payment for this workshop will be accepted online at KAI-RID.org No refunds will be provided after December 4, 2020. *The zoom meeting will be interpreted into spoken English. If you have other reasonable accommodation requests, please send them to presidentkairid@gmail.com *The co-sponsoring agencies of this workshop have policies on non-discrimination and on promoting an environment of mutual respect and free from bias including those policies of the Registry of Interpreters for the Deaf (rid.org).
